- **Reflect and write down what are the three most valuable concepts/learnings that you have acquired in this course so far.**

My ability to work in a team and stay organized has definitely improved in this course. Having to set up weekly meetings and keeping each other up to date on what were up to greatly influenced this,

- **Reflect and write down how your understanding of SE has changed from when you first started this class.**

I've learned a lot about SE in this course that I never thought of or even considered before. I never realized how group and leadership based it truly was.

- **What is the most important skill/practice that you think you need to improve when it comes to your personal contributions to your team?**

I could definitely improve on my time management, i'm always the last one to arrive to the meetings and cut deadlines pretty close.

- **For each of your team members provide a couple sentences of their performance as a team member and one suggestion for improvement.**

Thus far we have had very little issues in our team and I feel as if we all work very well together as a group and on a personal level as well. I will list what each other team member could still improve on.

Parker - Staying on task and not getting distracted

Ty - Staying focused and on task

Ryan - Reading the assignment without over complicating it

Matthew - Time management
